

Applicant Profiling and Assessment Criteria

Document ID: BY-E-005 | **Category:** Eligibility | **Status:** Active | **Version:** 1.0 | **Date:** 2018

Document ID	BY-E-005
Title	Applicant Profiling and Assessment Criteria
Category	Eligibility
Source	Affordable Housing Programme Development Framework Guidelines (2018); Boma Yangu Portal
Publication Date	2018
Version	1.0
File Name	BomaYetu_Eligibility_Profiling_Assessment_2018.pdf
Status	Active

Overview

The Housing Portal creates a profile of each applicant through **automated vetting and scoring**. This process is **fully automated** to avoid human bias.

Vetting Process

Vetting is initiated through the automatic assessment of data provided by registrants. Final vetting requires upload of specific **KYC documents**:

Document	Requirement
ID Card	National ID Card or Passport
Birth Certificate	For dependants
KRA PIN Certificate	For income verification
Spouse's ID	If married
Marriage Certificate	If married

Scoring Process

Scoring is done through:

Method	Description
Credit Reference Bureau (CRB)	Verification through third-party interfaces
Mobile Network Operator	Provides mobile wallet transaction history
Thin File Assessments	For those with little to no conventional transaction histories
Data Analytics	Credit and risk decision-making is fully automated

Property Assignment Rules

Rules from the Housing Fund make up the terms and conditions of acceptance:

Rule	Application
Valuations	Pre-purchase process
Property Transfer	From developers to Housing Fund
Insurance	Of the houses

Applicant Profile Categories

Income Verification

Verified through KRA and payslips

Credit Profile

Created via CRB and mobile network data

Family Status

Marital status, number of dependants

Housing Preferences

Location, unit type, price range

Fair and Transparent Allocation

The allocation process is conducted through a **fair, transparent, and auditable** process with **no human interference**. Applicants are placed into different groups based on their profile to ensure **diverse communities** are created.

Key Process Highlights

Fully Automated

The entire vetting and scoring process is **automated** to eliminate human bias and ensure consistency.

Multiple Data Sources

Uses **CRB**, **mobile network operator data**, and **KRA** verification for comprehensive profiling.

Thin File Assessments

Special provisions for those with **little to no conventional** transaction histories.

Community Diversity

Applicants are grouped based on their profile to create **diverse and inclusive** communities.

Quick Summary

Vetting: Automated KYC document verification | **Scoring:** CRB, Mobile Data, Thin Files, Analytics

Categories: Income, Credit, Family, Preferences | **Allocation:** Fair, Transparent, No Human Interference

Key Principles

- No human bias in vetting or scoring
- All data sources are integrated automatically
- Allocation is auditable and transparent
- Communities are built with diversity in mind
